

The Constitution.

ATLANTA, GA., JANUARY 5, 1879.

The Charleston News and Courier puts the valid funded debt of South Carolina at not exceeding two and a half millions. Our sister state has come out in surprisingly excellent shape.

COMPTEUR KNOX says the national banks are ready to resume. They hold about forty millions of gold, and their legal-lender reserve is equal to twenty-five per cent. of their circulation. He, therefore, concludes that the concerns to which he is indebted for a living are prepared for all emergencies.

A NEW YEAR always leads to statistics. All we possibly subjects are summed up. We are told, for instance, that ninety-six murderers were hung in the United States during 1878, or thirteen more than in 1877. All were men, forty-one were white, fifty-two colored, two Indians and one Chinaman. Two thousand executions took place. Five of the total number were hung in Georgia, ten in Texas, and six in Pennsylvania.

GENERAL BIDDULPH and Stewart are advancing on Candalah, while General Browne holds fast at Jellahabad, although the wild hill tribes render it very difficult to keep open the Khyber pass, through which all his supplies must come. Shere Ali's whereabouts remains a mystery, and so for that matter is Yakkob Khan's attitude. The prestige of the British is, however, very great in central Asia, and the Beluches are preparing to aid General Biddulph in his campaign in southern Afghanistan.

The reports compiled in the various cities of the country at the close of the old year unmistakably show a larger business in 1878 than for 1877. The volume of real healthy business was probably never larger in this country than it is now. We buy only what we need, we build railroads for present use, and we manufacture for actual consumption. We are not dealing in suburban lots, nor starting corporations to take in the injury. Our business is strictly based on the wants of the people. We no longer demand excessive profits. The land is full of food, and every day is bringing us nearer contentment and a reasonable and healthy prosperity.

The socialist spectre appears now in Russia. The land is filled with secret societies that wield great power, issue commands which are always obeyed, and perpetrate assassinations. The king trade is demoralized all over Europe, and the trouble has a common origin. Its various names mean the same thing. The nihilists of Russia, the communists of France, the socialists of Germany, the internationalists of Spain and other countries are all parts of a system that intends, by fair means or foul, to give all classes an even chance in the race of Zack Chander's effete monarchies are actually slumbering on the traditional volcano.

The French Republic.

To-day twenty-nine departments of France elect seventy-five senators, and seven vacancies in other departments will be filled. Of the senators who are about to retire only twenty are republicans, the balance belonging to the different branches of the opposition to a definitive establishment of the republic. The senate up to this time has contained a majority of twenty opposed first, last and always to the republic, although unable to agree upon the exact nature of the succession.

The body was in fact intended by its inventors as a barrier to a complete establishment of republican institutions.

It consists of three hundred members, seventy-five of whom were chosen for life, the other two hundred and twenty-five being elected by departments for nine years, but so classified that one-third should go out every three years.

To-day's election is the first of the triennial contests, and the first of the annual contests, which are to be held at the general fall in prices, and nearly all the balance to a reduced consumption. In filling and sweetening the cup, for example, that holds the breakfast beverage over thirty-two millions less than in 1877.

This is economy, not the republican party.

In the list of exports we find nothing that shows the power of this reception business is ascertained it will be found that the spontaneity of the performances was all inspired through the machinery of the public service and represents foreign appreciation of Grant as a typical American just about as much as John Sherman should thank his lucky stars.

In nine months of 1878 the exports of merchandise exceeded the imports by \$209,326,738, an increase of \$154,866,404 over the excess for the corresponding months in 1877. This vast improvement of balance came from a reduction of \$48,593,797 in the net imports, and a growth of \$106,272,607 in the domestic exports. The share was not to all thinking Americans who saw it in process of enactment in Europe the past year, and it is high time that the plodding, sensible, honest people of the country were plainly told that the organizers of the Grant movement are gulling them with the sorriest sort of tact. We do not mean to say that many of the honors paid to Grant were not meant to be genuine, but we mean that those who were induced to bestow them were as badly fooled as have been the people upon this side of the ocean.

When the true inwardness of all this is known it will be found that the republicans are to be held responsible for all the trouble, and the trouble has a common origin. Its various names mean the same thing. The nihilists of Russia, the communists of France, the socialists of Germany, the internationalists of Spain and other countries are all parts of a system that intends, by fair means or foul, to give all classes an even chance in the race of Zack Chander's effete monarchies are actually slumbering on the traditional volcano.

Some Financial Flyers.

No history, sacred or profane, will record a parallel to the irruption of the carpet-baggers into the southern states at the close of the late war. They came, as has been pointed out, "not through colonization or conquest," not as our forefathers came across the ocean, or as their ancestors went into England, behind the banner of the great Normandy bastard.

They came, after long and watchful circling through the air, settling at last in awkward haste upon the prey. Their heads had been whetted by fasting, and the emptiness of their stomachs was evident. For four years there was glutting and gauging, and ominous silence—then a rising roar, a gorged flight, and patriots walked where the vultures had been.

This period of plunder furnishes many curious studies. The art of theft, concealed since the apple tree lost its fruit, received new manifestations there. None of the actors in that tragedy of wrongdoing, however, deserve so much attention as the one who managed the finances—the Moses and the Littlefields. They were the stars of this unholy cast. Starting without a dollar, rose to millions, and reverted to penury within a few months. With sublime audacity they built against fate, and borrowing checks drew at sight on destiny. They bought palaces with a nod, and paid for them with a draft on nowhere. They issued bonds on alleged railroads and put mortgages on supposed property. They were the Napoleons of finance. Their lives were blended comedy and tragedy with the quick actor of pantomime. The world was dazzled at their splendor, and was obliged at being swindled by them. Their careers were short—up like a rocket, down like a stick.

In our issue of Friday we published a graphic history of one of the most noted of these bold thieves—Frank Moses, of South Carolina, who, by the way, was a native southerner. A more remarkable American is the most gullible creature on the face of the globe claiming capacity for self-government. He is born to get the better of the balance of the world and lives his eventful life through totally oblivious to the fact that he will die on the spot. And yet it is these and these alone that have brought us, thank fortune, to all the blessings of equivalency. Let us hope that our commercial condition is, and will continue to be such that administrative blunders cannot deprive us of what has come so much suffering and so many unnecessary disasters.

A Call for Help.

There probably never was a day in the history of Atlanta when charity was more imperatively needed than this morning.

The terrible cold weather that has seized the city is unprecedented in its severity. It has come to a pitch, when to be without fire does not mean discomfort, simply, but it means disease, agony, and death. Our telegrams tell of numbers of persons who have frozen to death within the last day or two. There are scores of families this morning—worthy families, widows, invalids and children—who are within the sounds of our church bells, and who are shivering as this is written in progress in Europe. From the day that General Grant landed at Liverpool and began the free-lunch rounds of European cities and capitals, the cable and the press of America have been burdened with costly bulletins of his route and his performances. The movements of the Kansas grasshopper and the Missouri potato bug were never more faithfully and minutely chronicled. The ex-president, with his gang of satellites has made the grand rounds of the continent and is now preying upon the hospitalities of the oppressed, yet all too generously some sons of Erin. There is no sign given of an abatement of his cheek and voracity.

It is a simple thought to action? Can it be possible that innocent children and delicate women can suffer for the lack of a little fuel, in the heart of this great, rich city, and not find a hand to help them?

We need not rely upon the societies of the city to cover the ground. There is no society rich enough to do the work. We have to rely almost entirely upon the Ladies' benevolent home, and they have no money. Besides, organized societies cannot do this work. It is a case where individual charity is needed.

This is the way to do it: There is not a

man who will read THE CONSTITUTION this morning who is not able to give at least a little fuel or a little money to buy it, and who does not know of some worthy family that is to be destitute. Then let every man who reads this see to it at once that some relief is offered to some one. There is no sense in delaying it because of Sunday. A better deed could not be done on this blessed Sabbath morning. Then get about it at once. To-day will be a day of agony to some poor people that your action might relieve. It will be a sin on your soul and a blot on your humanity if you sit still and suffer it.

There are any persons who do not know in what direction to put their charity, they can have it promptly put in the hands of the ladies of the "home" and properly distributed. If you cannot contribute directly, come to THE CONSTITUTION office to-morrow and leave your money with us, and we will see that it is put where it will serve a humane purpose.

We have not overdone the picture. It is really an emergency that is desperate, and the heart of the city should be nerve to action—to prompt and generous action.

The Balance of Trade.

John Sherman may spread his tailfeathers and the rest of the republican party glory themselves as much as they like over resumption, but the fact remains that the act which was passed when the balance of trade was against us would have remained a dead letter had not hard times made our people economical and nature given us successive crops that afforded vast surpluses for export. These two things—the one an outgrowth of the panic of 1873, and the other a blessing from the hand of Providence—and not the exceeding wisdom and patriotism of the republican party, have made resumption a reality. The good and able men, forty-one were white, fifty-two colored, two Indians and one Chinaman. Two thousand quadrupeds were hung in Georgia, ten in Texas, and six in Pennsylvania.

GENERAL BIDDULPH and Stewart are advancing on Candalah, while General Browne holds fast at Jellahabad, although the wild hill tribes render it very difficult to keep open the Khyber pass, through which all his supplies must come. Shere Ali's whereabouts remains a mystery, and so for that matter is Yakkob Khan's attitude. The prestige of the British is, however, very great in central Asia, and the Beluches are preparing to aid General Biddulph in his campaign in southern Afghanistan.

The reports compiled in the various cities of the country at the close of the old year unmistakably show a larger business in 1878 than for 1877. The volume of real healthy business was probably never larger in this country than it is now. We buy only what we need, we build railroads for present use, and we manufacture for actual consumption.

We are not dealing in suburban lots, nor starting corporations to take in the injury. Our business is strictly based on the wants of the people. We no longer demand excessive profits. The land is full of food, and every day is bringing us nearer contentment and a reasonable and healthy prosperity.

The economy of the republicans, and the party that is to be held responsible for all the trouble, and the trouble has a common origin. Its various names mean the same thing. The nihilists of Russia, the communists of France, the socialists of Germany, the internationalists of Spain and other countries are all parts of a system that intends, by fair means or foul, to give all classes an even chance in the race of Zack Chander's effete monarchies are actually slumbering on the traditional volcano.

The attention of the Teller-seller sellers is called to the unanimous way in which the negroes in Twigg's county, of this state, have been bulldozed. Of their own motion, in mass meeting, they resolved hereafter to support the democratic candidates.

TEXAS WILL inaugurate her new governor to-morrow.

ADMIRAL PORTER is in a fair way to be hoisted with his own trumpet. Let the hoist proceed! He can be spared.

SPINER is fond of Florida because of the orange blossoms that grow there.

THE mayor of Augusta believes in "every man his own doctor" and has vetoed the ordinance creating the office of city physician.

ST. LUCIA HUTCHINS, of the Washington Post, called old Hamlin an "anachronism," and Hamlin is hunting for Hutchins with a pin-hole.

THE five stages of brandy and water. First comes the brandy, second brandy and water. Third—burnt water. Fourth—brandy. Fifth—Collapse!—Punch.

"Good, good! How now you've changed. Wouldn't never have known you if I'd seen you last year." "Great God! What's this? Mrs. Key and Mrs. Thomas have large families of children, and have little taste for Washington society.

CYCLOPS SAM still has out one billion one hundred and fifty-four million acres of land, and is still a good fellow.

—Patti has a house in Wales near the sporting estate of the Prince of Wales.

—Happy is the man who can sit all day behind a far-room stove looking for work.

—Gladstone gets \$50 a page for his contributions to the nineteenth century, while smaller fry have to pay up with \$10.

—Mrs. Key and Mr. Key and Mrs. Thomas have large families of children, and have little taste for Washington society.

—Prince Sam still has out one billion one hundred and fifty-four million acres of land, and is still a good fellow.

—Those who have met Mrs. Grant in Europe say that she is a very good woman, and a good housekeeper, and a good mother.

—Mrs. Myra Clark Gaines has very simple habits and tastes, and dresses very plainly but in excellent taste. Her wardrobe, she says, does not cost her \$10 a year.

—The five stages of brandy and water. First comes the brandy, second brandy and water. Third—burnt water. Fourth—brandy. Fifth—Collapse!—Punch.

—Good, good! How now you've changed. Wouldn't never have known you if I'd seen you last year." "Great God! What's this? Mrs. Key and Mrs. Thomas have large families of children, and have little taste for Washington society.

ROUNABOUT IN GEORGIA.

—There is a growing demand for farm lands in Oglethorpe county.
—From Athens to Augusta the Georgia railroad does not cross a single stream.
—A few farmers in Oglethorpe county have already hedged some cotton land.
—The new jail in Eastman will soon be completed.

A larger acreage than usual was sown in wheat in Whitfield county.

—W. W. Carnes has been elected captain of the Mason Volunteers.

—There are more home-raised corn and pork in Oglethorpe county than has been known for years.

—The ordinary of Wilkinson county has issued 110 marriage licenses during the past year.

—The military of Savannah are making preparations for the observance of the 19th of January.

—The Savannah gaslight company will, on and after Monday 13th, pay a dividend of 2½ per cent.

—Wilkinson county has, in smoke-houses and barns, a sufficiency of meat and corn for one year.

—N. H. Miller, of Randolph county, a few days ago killed a buck which weighed 150 pounds.

—Mr. N. R. Tilton, of Savannah, also Captain Home, and others, have fine horses in excellent condition for the races.

—At a sale in Oglethorpe county last Tuesday cows brown, br. from \$5 to \$10; horses from \$50 to \$75, and mules from \$10 to \$50.

—A two-year-old son of Mr. George Guest, of Taliaferro, was accidentally shot and painfully wounded by his four-year-old brother a few days since.

—Directors of the Central railroad company will be elected on Monday. Stockholders will be passed free over the road to Savannah from the 31 to the 6th.

—Mr. Thomas Bryant, of Randolph county, killed on the 24th of December three dogs, fourteen months old, that weighed 70½ pounds.

—On a two-horse farm, Abe Faust, of Oglethorpe county, this season, killed 1,225 pounds of pork, made 150 barrels of corn, 11 bushels of cotton, and 500 peaches, and ground-peas in proportion.

THE GREAT DISCOVERY.

A New Household Word.

But compare lively news of the forty millions of people in the United States have as yet heard of that other wonderful discovery, Carbolic acid, which the world is now as well as the tens of thousands who have already a knowledge of the article are speaking its praises and soon "Carbolic" will be as familiar a word throughout the English-speaking world as "petroleum" was a few years ago.

A few facts connected with the history of Carbolic will prove interesting to our readers. 1. It was by the initial idea of a scientist, when he was a boy, that he laid the foundation of the same, and that the effects of the effects of petroleum, that the effects of petroleum were noticed.

2. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

3. It was a young scientist who discovered petroleum.

4. Every one who has a penetrating active mind, it cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

5. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

6. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

7. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

8. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

9. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

10. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

11. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

12. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

13. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

14. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

15. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

16. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

17. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

18. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

19. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

20. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

21. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

22. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

23. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

24. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

25. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

26. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

27. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

28. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

29. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

30. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

31. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

32. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

33. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

34. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

35. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

36. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

37. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

38. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

39. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

40. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

41. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

42. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

43. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

44. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

45. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

46. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

47. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

48. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

49. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

50. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

51. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

52. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

53. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

54. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

55. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

56. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

57. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

58. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

59. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

60. The best refined petroleum cannot be used as a hair dressing, and the chemist's art had to be employed to save to the world the use of the hair.

SIDEWALK NOTES.

A Choice for Constables.

Yesterday we had another election.

Two constables were chosen for the 10th district, Georgia militia. The election was held in the office of Justice Butt, in the Jameson building.

There seemed to be considerable interest in the poll and many candidates were in presence all day.

On the 11th a few more candidates were in.

The balliffs' election was quite lively yesterday.

Puddings just now are 'current events.'

—How naturally "Christmas toys" rhyme with boys, joys and poise.

Everybody is using Carter's fancy flour.

Why don't you?

The fire fund seems to be abroad over there.

Over-cards were not to be discarded yesterday.

—Almost everybody in the city cherishes a first-class cold.

—New attractions at the opera house the coming week.

—The balliffs seem to be running the politics of our city.

—The superior court will commence business this morning.

—A notice is for those who have never used Carter's fancy flour. Give it one trial.

—Everybody was laying in a supply of coal yesterday.

—The matter of contesting seems to be on the decline.

—Several bankrupt tourists, otherwise callous tramps, are prospecting in our city.

—The street-car mule gets plenty of out-door exercise.

—Water without ice was the favorite beverage yesterday.

—Enigration to the west has fallen off considerably during the past two weeks.

—Water pipes are bursting by the dozen in all portions of the city.

—He sure to invest a nickel in the Sunday Press.

—The price recently offered by Professor W. H. Peck for the best short story brought to light a considerable amount of literary talent, which had hitherto passed unnoticed. Quite a number of the writers of the stories will be the victor.

—Carter's fancy flour is away ahead of anything. Why don't you just go to see if this is so?

—Ask your grocer for a sample.

—Remember that Ives & Thomas are selling bed-room and parlor suites 10 per cent. cheaper than any house in Georgia.

—The new city council meets to-morrow night at the council chamber in the city hall.

—The grounds of the city hall park are covered with election tickets thrown away after the closing of the polls.

—A good deal of building is going on in our city notwithstanding the condition of the weather.

—Three dollars per seat won't pay in Atlanta. Our people don't want to go to the theater that bad.

—The way to keep your water pipes from bursting is to keep the water on at night and let it run slowly. As long as the water runs, it will not freeze.

—Passenger travel has been good for the past three weeks, and all of the railroads leading into our city have been doing a fine business.

—There will be a very interesting service at St. Philip's church this morning, for which Mr. William R. McConnell will be ordained to the deaconate. Bishop Beckwith will conduct the service and preach.

—Mr. James C. Shaw, general passenger agent of the Central railroad, was yesterday at the city to meet and put our office a call.

—Hon. Hiram P. Bell and Hon. Henry T. Moore will be through the city yesterday to Washington to take their seats in Congress.

—Captain John W. Anderson, chief deputy United States marshal of the southern district of Georgia, with headquarters at Atlanta, in the city, has been a guest at a dinner at the Central railroad, yesterday.

—Mr. J. C. Shaw, one of the most popular dry goods salesmen in the city, has been a guest at a dinner at the Central railroad, yesterday.

—James Strong, a notorious negro thief, was arrested by Officers Mansfield and Smith yesterday upon a charge of larceny.

—The recorder's court was the place where James Strong, a notorious negro thief, was arrested by Officers Mansfield and Smith yesterday upon a charge of larceny.

—The recorder's court was the place where James Strong, a notorious negro thief, was arrested by Officers Mansfield and Smith yesterday upon a charge of larceny.
